Django

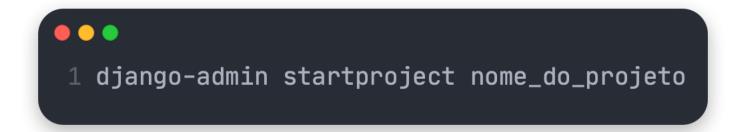

startproject, startapp e admin

Instalação e startproject

Instalação.

```
1 pip3 install django
2 python -m django --version
```

startproject.

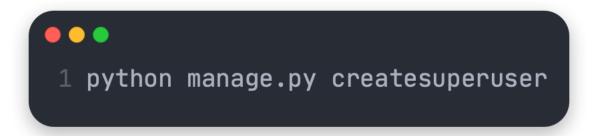

Criando e rodando *migrations*

Migrations.

1 python manage.py mamkemigrations
2 python manage.py migrate

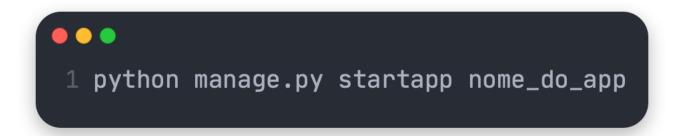

Criando o superuser

Criando superuser.

startpapp e admin

startapp.

A primeira model.

```
1 from django.db import models
2
3
4 class Seller(models.Model):
5    full_name = models.CharField(max_length=255)
6    email = models.EmailField(max_length=255)
7
```

A cada nova model ou alteração em uma existente, precisamos realizar novamente o processo das migrations.

olist

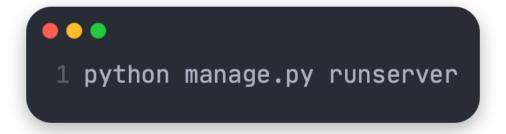

Registrando a model no app admin.

```
1 from django.contrib import admin
2
3 from seller.models import Seller
4
5
6 class SellerAdmin(admin.ModelAdmin):
7 list_display = ('full_name', 'email')
8
9
10 admin.site.register(Seller, SellerAdmin)
11
```

olist

Hora de conferir o *resultado!*

Rodando a aplicação.
